C. E. FIELD PLANT FARM

*Berry and Vegetable Plants
Roots and Seeds*

PRICE LIST FOR 1941

STATE OF NEW JERSEY
DEPARTMENT OF AGRICULTURE
TRENTON

No. 157

Trenton, N. J., September 1st, 1940

THIS IS TO CERTIFY that we have this 15th day of July, 1940 in accordance with the provisions of Chapter 7, Title 4, Laws of State of New Jersey, caused to be inspected by a duly appointed inspector the general nursery stock growing in the C. E. Field Estate nursery of C. E. Field Estate at Sewell, in Gloucester County, New Jersey and have found same apparently free from San Jose scale, and other dangerously injurious insect pests and dangerously destructive plant diseases.

This certificate expires September 1, 1941 and covers only stock actually in the nurseries when examined.

HARRY B. WEISS, Chief, Bureau of Plant Industry

W. H. ALLEN, Secretary of Agriculture

STRAWBERRY PLANTS

Varieties of STRAWBERRIES

PATHFINDER, Per. A new variety originating at the New Jersey Agriculture College. The result of a cross between the Premier and Aberdeen. Very vigorous in plant growth, making a sufficient number of plants for a good bed but much larger and heavier foliage than either of its original parent plants, also very resistant to plant diseases. Will produce a large crop of fruit, medium to large in size, uniformly smooth and regular in shape, good color, moderately firm and a good flavor, a promising new variety.

BLAKEMORE. Per Early—A good early variety that has been thoroughly tested. It is a vigorous grower, making plenty of good strong plants. Berries larger than the average extra early variety, bright red in color, good flavor and firm flesh, making it a good commercial berry.

PREMIER. Per (or Howard No. 17) Early—This is one variety sold under either name. Size medium to large, good color and a firm berry, plants very vigorous making good beds and more resistant to frost than other varieties. You can not go wrong on them.

SUCCESS. Per Medium Early—An old reliable that we will still recommend for the home garden. It makes good strong plants and plenty of them to form a sufficient bed for a good crop of fruit, the fruit is extra large, excellent flavor and has a long picking season, in fact all anyone could desire in a home berry or near by market, it is not a distant shipper.

FAIRFAX Per Early

The most wonderful introduction of strawberries in recent years. It makes a moderate number of exceptionally strong heavily rooted, large crown plants, very productive of big beautiful berries.

The fruit is the best of flavor rich red in color with bright green caps. It starts picking a few days later than Premier. It is exceptionally firm and stands distant shipping also desirable for home garden or road side market as it has the quality and good appearance.

CATSKILL Per.

A new midseason variety, making plenty of large strong plants, a heavy producer of large berries of good quality, light red in color, with large green caps, making it very attractive and sells well on the market.

DORSETT Per.

This new berry has already become a favorite with many growers. It ripens with Premier, makes a vigorous growth of foliage, not as large a plant as the Fairfax but makes them more freely, often requiring thinning and spacing. The fruit is large, light red in color, good flavor and firm texture making it a good all around variety.

225

A new berry originated by the New Jersey Experimental Station. Late, excellent color, good fruiting bed, good flavor.

ABERDEEN Per.

Under favorable conditions outyields any other. The fruit averages large throughout the season, bright shiny red in color, uniform in size and shape and has a beautiful green calyx that adds much to its appearance.

CHESAPEAKE. Per Late—The choice of berries with many growers, but it has its fault, unless planted on extra good land and good attention is given it, it does not make a sufficient bed to produce a good crop of berries. The fruit is large and the best of quality, but must be planted on good rich loamy soil for the best results.

GANDY. Per. Late—The latest of all summer varieties, plants strong and vigorous, berries extremely large and extra firm and good color. Not considered the best table berry but being extra fancy and a good shipper it is a profitable commercial variety.

LUPTON. Per. Late—This berry originated in South Jersey and has become very popular, it makes extra large plants and a sufficient number to form a good fruiting bed. It is a handsome berry of excellent quality and we can recommend it, either for commercial planting or the home garden.

BIG JOE. Per. Mid-Season—Extra large berry, coloring all over alike, the texture is one of the best, giving it excellent shipping qualities, making it a favorite with many growers.

WM. BELT. Per. Midseason—The best yet of its season. Plants vigorous and prolific, fruit, medium to large, the best of all flavors, most perfect in shape, brilliant glossy red and ripens all over alike.

NORTH STAR

A wonderful new variety, originated by the department of Agriculture. This variety makes a small number of plants and heavy foliage which protects the blossoms from frost, making it desirable in localities where late frosts are concerned. The berries are extra large, bright red in color, of good flavor and hold up well.

MASTODON

We believe this variety to still be the leader in everbearing strawberries, very vigorous in plant growth making a limited supply of exceptionally large plants. The fruit is large, of good quality and attractive in appearance.

The one variety that will do well most anywhere.

GEM

This everbearing variety became very popular, The plant is very vigorous, making medium size plants and plenty of them.

It is very productive, fruit medium to large, light red in color and very firm in texture holding up well.

We believe it will produce more fruit in the fall than any other everbearer we have tried out.

WYZATA

One of the newer varieties in everbearing. It has already made great records in some sections of the country. It makes exceptionally strong vigorous plants but very few new runner plants making it ideal to grow in the hill system. The berries are large, bright red in color and the best of flavor. We have a limited number of plants to offer this season at prices quoted here.

25 plants \$1.25 50 plants \$2.25 100 plants \$3.75 Postage prepaid.

We dig and ship berry plants from March 1st until May 20th

VEGETABLE PLANTS

Cabbage

Yellow Resistant Strains

Early Cabbage Plants

The first lot of cabbage plants we have to offer are the drilled plants from the cold frames, which are usually ready by the middle of April. We will have the early and summer varieties ready by this time.

Field Grown Cabbage Plants

Cabbage seed is sown in the open field in the month of March. These plants will be ready to ship early in May. We make continuous sowings to have a good supply of plants on through the season. You will notice a much lower price on the field grown plants, as the cost of producing them is much less when growing them in the open field.

Tomato

Early Tomato Plants

Our first supply of tomato plants is the transplanted plants from the cold frames, which are ready after May first. The next to be ready are the drilled plants from the cold frames. They are ready about the 15th or 20th of May, at a much lower rate. We will grow the following varieties this year: John Baer, Chalk's Jewell, Scarlett Topper, Marglobe, Rutgers, New Stone and Stokesdale.

Field Grown Tomato Plants

The main crop of tomato plants is grown in the open field. They are drilled thin so as to make good strong plants about eight to ten inches tall. They will be ready the first week of June. We make several sowings to keep a supply on hand throughout the entire season. You will notice that the price is much lower on these plants owing to the lower cost of producing them in the open field.

Broccoli, Lettuce, and Beet Plants

Our first supply of these vegetable plants are drilled plants from the cold frames; ready about the middle of April. After the middle of May we can fill orders from the field grown plants at a lower rate. Will grow the following varieties: Lettuce—Big Boston, Romain, New York and Iceburg. Beets—Early Egyptian and Detroit Dark Red. Broccoli—Calabrese Imp.

CELERY

Our celery plants are grown in the open field only. We are usually prepared fill orders any time after the First of May. Will grow the following varieties: Golden Self Blanching, White Plum, Winter Queen, Giant Pascal and Easy Blanching.

SWEET POTATO PLANTS

We will have a good supply of sweet potato plants and will be prepared to fill orders any time after the 1st of May. Will grow the following varieties: Up River and Kelley, these two varieties are yellow, we also have the Jersey Red and Yam.

EGG PLANTS

Egg Plants are more difficult to grow than most other plants, it requires much more warmth and extra care to grow them, in fact they should not be set in the open field until the weather becomes quite pleasant. Varieties: Black Beauty and Florida High Bush.

PEPPER

Pepper plants are grown in cold frames only, as the field plants would be entirely too late to be of any use. The transplanted pepper plants will be ready by May 10th, and the drilled plants by May 20th, at a much lower rate. Varieties: Ruby King, Ruby Giant, World Beater, Bullnose, California Wonder and Long Red Cayenne.

Also Cheese Pepper.

ASPARAGUS ROOTS

Our Roots Are Grown From High Grade Seed

The seed used to grow these roots came from the best strain of Asparagus in South Jersey.

Asparagus beds last for a number of years, the profit during those years depends on the foundation of the bed. The whole secret is good thrifty roots from the best seed obtainable. What we have to offer is a selected strain of Martha Washington, which produces larger stalks, more rust resistant and cuts a lot more colossal grass than other varieties including other Washington strains.

Price of Asparagus Roots Transportation Fully Prepaid

3 Year No. 1 Roots	1.00	1.50	2.25	7.00	12.00	11.50

RHUBARB ROOTS

This is one of the earliest crops of the season easily grown. A bed will last for a number of years.

We have two varieties: Mayatts Linneaus and Victoria both popular varieties with large stalks of cherry red color.

We have a good supply of one, two and three year old. The 1 year will run from $\frac{3}{4}$ to 1 inch at crown. The 2 year will run from 1 inch to $1\frac{1}{2}$ inches. The 3 year will run 2 inches and up.

3 Year No. 1 Roots	1.20	2.00	3.50	6.00	20.00	36.00

HORSE-RADISH ROOTS

One of the easiest crops to grow

Horse radish grows well in all soils. If planted in early spring it will make large roots to dig by early fall. Horse radish can be dug any time during the winter that the ground is not frozen, or left until spring and will keep increasing in size throughout the winter.

It should be planted in four foot rows, about two feet apart in the row. Set roots with large end up, about two inches below the surface.

We are growing the Malinea Kern variety which is superior to all others. They are very rampant in habit of growth, outyielding all, and pure white when grated.

We have an exceptionally nice lot of roots cut in six to seven inch lengths. No. 1 the heaviest will run as nice as any you can buy. The No. 2 will run about half the weight of the No. 1. We also have a third grade which will be from three to six inches in length.

Price of Horse-radish Roots Transportation Prepaid

	12	25	50	100	500	1000	5000 Per M
No. 1 Roots	\$0.30	.50	.75	1.25	4.50	8.00	7.50

After November 1st we supply roots for grating, write for price.

RASPBERRIES

LATHAM—Red. One of the strongest and most vigorous growers, yielding good crops of large berries. Recommended for garden or commercial planting.

CHIEF—Red. The earliest of red raspberries. It makes a vigorous growth and is exceptionally hardy. The fruit is not as large as the Latham, but very productive, of bright red firm berries, making a variety for general planting.

ST. REGIS—Red. The most popular everbearing raspberry. It bears a good crop in June, then again in Sept. and continuous until freezing. It is medium in size and has a good flavor.

CUMBERLAND—Black. The standard of black raspberries. The fruit is large and attractive, firm and of excellent quality. Recommended for home use and distant market.

NEW LOGAN—Black. This is the choice of many growers. A strong and vigorous grower, very resistant. The fruit is large glossy black, a good shipper and one week earlier than the Cumberland.

BLACKBERRIES

ELDORADO—The most popular of all Blackberries. It is a strong upright grower, the fruit is large. Jet black and excellent flavor.

EARLY HARVEST—The earliest to ripen, most productive of early varieties. The canes make good strong growth, The fruit medium to large, first quality.

DEWBERRY-LUCRETA—Most popular and we believe to be the choice of Dewberries. Priced the same as blackberry plants.
